

## Retro vintage design updated for the modern age

- 2000+ watts of heating power (20 amp, 120v outlet required)
- 360 watts of intense cooling system. Hand cool <2 min, room cool in a little as 3 minutes for a kilo
- Dimensions: 14 3/16" wide X 28" long X 21" high (without hopper- 26" with)
- Roast times. As little as 12 minutes or as long as you want. Average roast time is 14-15 minutes to second crack.
- Capacity: 100 grams to 1 kilogram; 3 to 36 ounces
- Heavily insulated for efficiency and safety
- 3 lb perforated roasting drum, 13 lb roast chamber for stability
- Controllable recycled roast chamber air for added efficiency
- Adjustable Roast chamber air flow
- Improved smoke suppression system
- Bean mass and Chamber thermocouples and display

### *Run from your laptop*

- Artisan interface and controllable
- USB communication port

### *Everything in a professional drum roaster for the discerning home roaster or micro-roasting enterprise*

- View Port
- Professional style trier
- Perfect sample roaster for shops and coffee professionals

***Stretch out first crack for a beautifully even third wave style coffee  
or take it to a deep rolling second crack if that is to your tastes.***

## Profile roasting
